

Revox ernennt Ryan O'Connor zum President - North America.

Januar, 2025 – Ryan O'Connor übernimmt die Position des President - North America innerhalb der Revox Group.

Wir sind stolz darauf anzukündigen, dass Revox seine Geschäftsaktivitäten auf dem nordamerikanischen Markt weiter ausbaut. Einer unserer ersten Schritte war die Einstellung von Ryan O'Connor, CEO und Gründer von Reel to Reel Haven. Ryan führt das Analog Comeback in Nordamerika an und hat sich bereits als Marktführer für analoge Produktionen etabliert. Aus diesem Grund und zusammen mit seinen anderen Erfahrungen haben wir uns dazu entschieden, ihn zum President - North America zu ernennen. Ryan wird für den strategischen Rollout aller Revox-Produkte in Nordamerika verantwortlich sein.

Revox appoints Ryan O'Connor as new President - North America

January, 2025 - Ryan O'Connor is going to take over the position of President - North America within the Revox Group.

We are proud to announce that Revox is further strengthening its business activities in the North American Market. One of our first steps was to hire Ryan O'Connor, CEO & Founder of Reel to Reel Haven. Ryan is leading the analog come back in North America and already has established himself as the market leader for analog productions. For that reason, combined with his other experiences, we have chosen to name him President - North America. Ryan will be responsible for the strategic roll out of all Revox Products in North America.

Ryan's love for audio started early as did his love for economics. Beginning his career with Collier's International and Bloomberg, Ryan honed his investment knowledge until he was ready to launch his passion company, Reel to Reel Haven. Reel to Reel Haven is a marketplace for all things tape. The company restores tape decks for major artists, institutions, foundations and consumers. They have their own transfer department with brand new baking ovens, master tape copy stations, listening room, and a 6,000 sqf live room built in the 1920's where he captures the highest quality recordings possible. His commitment to quality over quantity, his business experience, the energy level he brings everyday, the network he surrounds himself with and his clear love for studio sound quality make Ryan the perfect representative of the Revox brand in North America.

Revox - translated means „the reproduced voice“: The name itself already reflects the high demand to reproduce even the most complex and multifaceted of all sound sources, the voice, true to the original and in all its aspects. Revox is and will remain committed to producing products true-to-the-original studio sound quality. Through real research & development groundbreaking technologies have set the standards for the development of these innovative products and true milestones in the audio world for more than 75 years.

Revox Premium Audio Solutions combine the highest quality with timeless and awarded design. Sustainability plays a crucial role at Revox. Our products are developed uncompromisingly to remain compatible with the current portfolio, even after a very long time. As a true manufacture and traditional Swiss company Revox develops and produces its products in Switzerland and in Germany. For decades, Revox has set the valid standards worldwide for the studio recordings of the most famous artists in all music genres. Revox has always had a close connection to the music industry; we will continue to honor the industry by following our benchmark...music playback at home that is as close as possible to studio recordings - as immediate, as powerful and as alive as the original. Recently, Revox announced the return of the B77, the icon of tape machines, which will be produced as the newly developed B77 MK III. Step by step, Revox plans to offer new analog products. Please follow Ryan, Revox and the analog comeback as we bring feeling back to playback.

Christoph Frey (CEO Revox Group) said: “We are delighted to further strengthen our audio and analog business in North America. I'm very happy to have Ryan O'Connor on board as he's known to be an absolute audiophile. Furthermore he has experience in recording music as well reproducing the recorded music in the best possible way with high end products. Ryan O'Connor was already very successful to introduce our new B77 MK III to the American market and eminently supported us to strengthen our Revox brand. He is leading the activities of Revox to North America for analog audio but also for the best available Multiroom system (the Revox Multiuser System). Ryan will be a very important member of our management team. His dedication and his passion towards the best possible audio quality is 100% in line with our more than 75 years old dedication to bring the best audio quality from the recording Studio into the living rooms of our customers. The development of many new products is underway and we are looking forward to rebuild under the lead of Ryan the strong Revox foothold in North America.”

Ryan O'Connor said: “Revox is an important part of my music experience, I'm looking forward to working together with the Revox team and establish the brand even more in North America. Revox's huge technical know-how sets the standards in audio. The strong relations to the musicians motivates me to be part of this company. I am thrilled and highly motivated to write a new chapter of the Revox story together with the team and to be responsible for the strategic roll out of all Revox products in North America. I am looking forward to giving the highest quality audio product and recordings to music lovers.”
