

### Revox Multiuser IO module

The I/O module is located in the modular slot of the M30 or V219 and expands the Multiuser amplifier with 3 classic sensitive audio inputs (analog, optical, coaxial), as well as a configurable analog audio output. The signal from the inputs can be distributed to all rooms of the Multiuser system. The analogue output with DSP equalizing is used for expansion with multi-channel amplifiers for very large rooms or high-performance amplifiers for power-intensive loudspeakers.

### I/O module

Art. no.	156308000
Inputs	1 x analog (Cinch Stereo) 1 x optical (digital, TOS Link) 1 x coaxial (digital)
Data format (optical)	16, 20, 24 Bit PCM - SPDIF up to 96 kHz
Data format (coaxial)	16, 20, 24 Bit PCM - SPDIF up to 192 kHz
Max. input level (Analog input)	700 mV (full scale)
Analog output(PreOut)	max. 2.0 volt eff. with DSP-Equalizer
Preout mode	- Fix (Line Level) - Variable (incl. tone control) - headphone (variable, without mute)
DSP settings PreOut	- Presets for Revox loudspeakers - 1 x highpass - 8 x parametric EQ
