WALL COVERING

Revox INVISIBLE SPEAKER

DRYWALL OR SOLID WALL

MATERIAL

Composite polymer membrane with excellent acoustic properties and special cover layers for optimum adhesion

SLIM DESIGN

Low installation depth is suitable for almost any structural application.

Revox INVISIBLE SPEAKERS

FLAT-PANEL SPEAKERS - INVISIBLE INSTALLATION

Revox Invisible Speakers are flat-panel speakers that can be installed invisibly under plaster, wall paint, wallpaper or even tiles. The wall or ceiling becomes a sound source.

Revox Invisible Speakers are installed invisibly to give you complete freedom when designing your interiors. Naturally, all wiring is hidden and the speakers produce superb sound quality.

The broad dispersion pattern of Revox Invisible Speakers results in an impressive and harmonious sound that can be heard equally well throughout the whole room.

Revox Invisible Speakers are suitable for indoor / outdoor applications.

DISPERSION PATTERN

Revox Invisible Speakers create a sound pattern that fills the room.
