

Dear Revox partner,

we are delighted to present you with another product from the Revox range.

The Revox X44 DSP 4CH Amplifier is a premium 4-channel stereo power amplifier designed specifically for demanding audio applications. With its integrated digital signal processor (DSP) and flexible configuration options, it offers a perfect balance of power, precision and ease of use.

Find out all the details about the new Revox X44 DSP 4CH Amplifier in this newsletter.

Product info

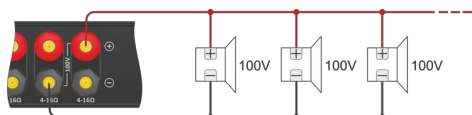

Revox X44 DSP 4CH Amplifier

Order No: 156304400

Price: € 1.890,- (incl. VAT)

100 Volt Mode

With this integrated amplifier, you can now also realize your 100 volt projects and connect several speakers in parallel over long distances. Circuit switching is also possible. This is particularly important in public buildings and hotels where the individual loudspeakers are far apart.

Performance features

- Power output: Selectable between 4 x 200 W and 4 x 400 W into 8 ohms, ideal for a wide range of applications.
- DSP processor: Easy configuration and adjustment of acoustic characteristics via user-friendly software.
- Functions: Noise gate, matrix mixer, parametric equalizer (PEQ), crossover, delay, compressor
- Supported filter types: Butterworth, Bessel, Linkwitz
- Flexibility: support for 70V and 100V systems as well as mono, stereo, free matrix and bridge modes.

Scope of delivery

- 4 inputs/4 outputs: DSP-controlled for maximum sound quality.
- Mini-USB connection: Simple configuration directly via the front panel.
- Inputs: Four balanced XLR inputs for professional applications.
- Protection mechanisms: Integrated safety functions against short circuits, overload, high temperatures and more.
- Design: 1U height, optimized for installation in 19" racks.

Documents

The operating instructions and technical data sheet for the amplifier can be found on our [support page](#).

If you have any questions, please contact our internal sales team or your sales consultant directly.

We look forward to continuing our good cooperation.
